- Benchmarking

"Medusys App with advanced data analytics, cannot only be used to document your practice but also in benchmarking and publications for safety and quality improvement of care.
The future of education in anaesthesia is bright & I Look Forward to Years of collaborative learning, research and better patient care through technology and AI"

Dr. Shiv Kumar Singh

MBBS, MD, FRCA Consultant Anaesthesia, Royal Liverpool University Hospitals, UK

EXECUTIVE SUMMARY

Medusys's Reflective anesthesia logbook also called ReAL is world's first AI enabled anaesthesia Logbook. It is record-keeping tool used by anesthesiologists, to document and track their clinical experiences, procedures, and patient care activities. It serves as a comprehensive record of the practitioner's education, training, and clinical practice in the field of anesthesia.

You can use ReAL to obtain the comprehensive Anaesthesia Management Tool Kit for your specific case/surgery procedure with a particular patient information and comorbidities. It will also provide the potential complications and Patient Centered Outcome Measures for the entered case.

INTRODUCTION

At its core, ReAL functions as a dynamic repository, encapsulating the breadth of an anesthesiologist's educational journey, hands-on training, and the spectrum of clinical practice within the realm of anesthesia. Its purpose extends beyond routine documentation, offering sophisticated and dynamic Anaesthesia Management Toolkit tailored to the nuances of individual cases, type of surgeries, factoring in specific patient information and comorbidities.
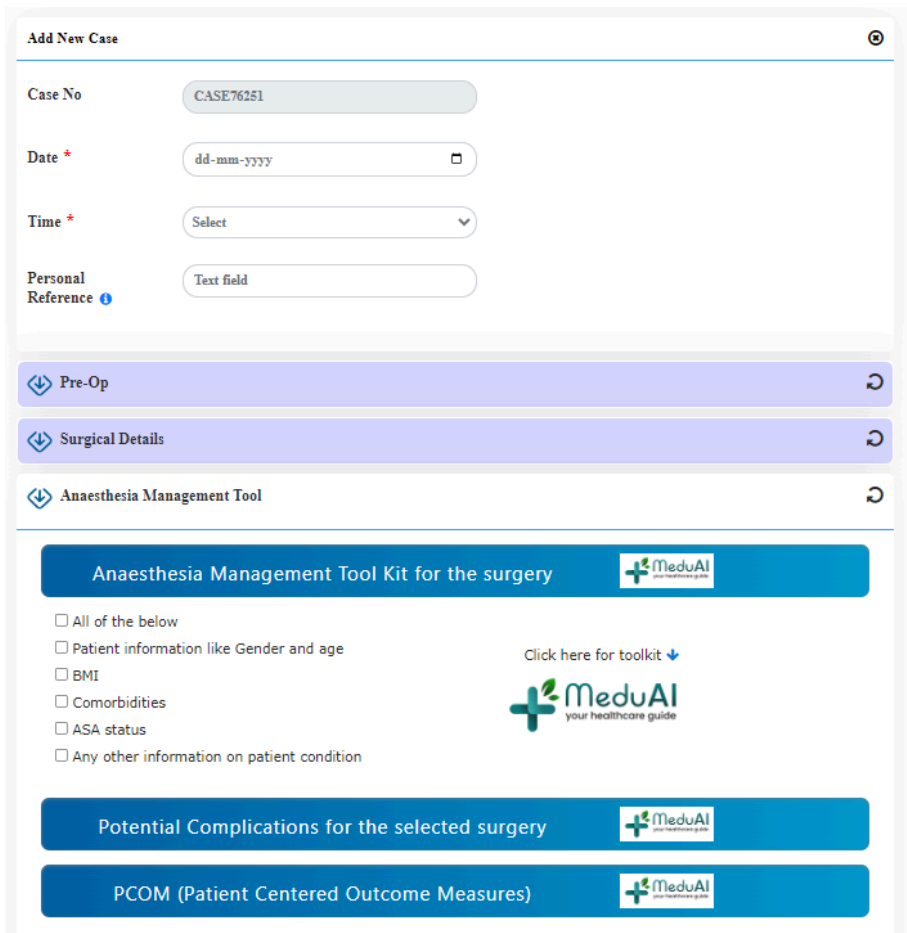

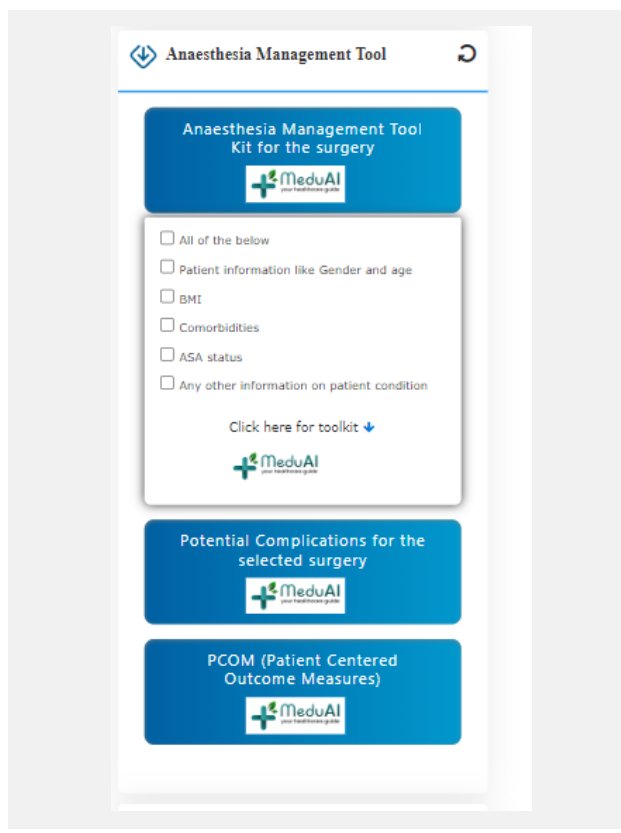

KEY FEATURES

Anaesthesia Management Plan

The Dynamic Toolkit includes the following sections for your planned surgery and is unique to particular patient information:

- Patient Assessment, Preoperative Evaluation, and Preparation,
- Anesthesia Techniques suitable for the planned surgery,
- Airway Management,
- Monitoring & Positioning,
- Pain Management,
- Fluid and Electrolyte Management,
- Management of Anesthesia-Related Complications, Communications,
- Postoperative Care &
- Outcome Analysis.

Explore the future of Anaesthesia, where every decision is informed, every outcome is improved, and every patient journey is personalized.
